

Visions and missions of the company Solutia s.r.o.

Within Solutia s.r.o. we have succeeded in building an expert base for providing services in the field of information technologies and information systems. We also focused on the related services including top-notch and efficient system integration, security and strategic advice and consultancy in IS/ICT.

We also deliver comprehensive and highly advanced tailor made enterprise solutions.

A team of specialists has been created to provide the services, engaging in the individual projects. Our specialists take part in regular highest-level trainings and certifications and are motivated, on an ongoing basis, to absorb new practices.

We simply want to continue to keep our thumb on the pulse of the time

We are ready to provide our customers with services:

- the customers need,
- that make it possible for the customers to optimise their internal processes,
- that allow the customers to manage their funds in an efficient manner,
- that allow the customers to perceive the IT environment as a major business tool rather than a source of problems.

How we want to achieve customer's satisfaction

Consistent application of the methodologies and corporate culture is a pre-condition to customer's satisfaction.

Basic company standards of Solutia include:

- methodologies for creation of software products,
- tool for creation of software products,
- project management methodology (PRINCE2[®], PM BOK),
- methodologies and tools for the analysis and modelling of corporate processes,
- methodologies and tools for implementation of modified corporate processes.

High workmanship of all employees of Solutia s.r.o., priority of customer's interests, adaptation to customer's demands, and complexity of provided services and accuracy in their execution are further preconditions on the imaginary ranking list of success assessment on the part of the customer.

Solutia's vision is to help its customers in addressing their complex assignments, create advance, efficient and safe solutions.
